# Introduction

---

# The SCPO theme

The **SCPO** theme is a Beamer theme that is to a large extent blatantly copied from the beautiful METROPOLIS theme.

Enable the theme by loading

```
\documentclass{beamer}  
\usetheme{scpo}
```

Note, that you have to have Mozilla's *Fira Sans* font installed to enjoy this wonderful typography. Then compile the file with XeLaTeX.

The bright red is not everyone's favourite, but so be it.

# About the font

*Please* install the **Fira Sans** fonts as described on the Github page.

Really. Computer Modern doesn't look good on this.

I'm not entirely sold to Fira Sans though. Perhaps a font that is less light might be better for slides.

# Sections

Sections group slides of the same topic

```
\section{Elements}
```

for which **SCPO** provides a nice progress indicator ...

## Title formats

---

# SCPO title formats

**SCPO** supports 4 different title formats:

- Regular
- SMALL CAPS
- ALL SMALL CAPS
- ALL CAPS

They can either be set at once for every title type or individually.

# SMALL CAPS

This frame uses the `smallcaps` title format.

## Potential Problems

Be aware that not every font supports small caps. If for example you typeset your presentation with pdfTeX and the Computer Modern Sans Serif font, every text in small caps will be typeset with the Computer Modern Serif font instead.

# ALL SMALL CAPS

This frame uses the `allsmallcaps` title format.

## Potential problems

As this title format also uses small caps you face the same problems as with the `smallcaps` title format. Additionally this format can cause some other problems. Please refer to the documentation if you consider using it.

As a rule of thumb: just use it for plaintext-only titles.

# ALL CAPS

This frame uses the `allcaps` title format.

## Potential Problems

This title format is not as problematic as the `allsmallcaps` format, but basically suffers from the same deficiencies. So please have a look at the documentation if you want to use it.

## Elements

---

# Typography

The theme provides sensible defaults to  
`\emph{emphasize}` text, `\alert{accent}` parts  
or show `\textbf{bold}` results.

becomes

The theme provides sensible defaults to *emphasize* text, **accent** parts  
or show **bold** results.

# Font feature test

- Regular
- *Italic*
- SMALL CAPS
- **Bold**
- ***Bold Italic***
- BOLD SMALL CAPS
- Monospace
- Monospace *Italic*
- Monospace **Bold**
- Monospace **Bold Italic**

# Lists

## Items

- Milk
- Eggs
- Potatoes

## Enumerations

1. First,
2. Second and
3. Last.

## Descriptions

**PowerPoint** Meeh.  
**Beamer** Yeeeha.

# Animation

# Figures

**Figure 1:** Rotated square from texample.net.

# Tables

**Table 1:** Largest cities in the world (source: Wikipedia)

City	Population
Mexico City	20,116,842
Shanghai	19,210,000
Peking	15,796,450
Istanbul	14,160,467

# Blocks

Three different block environments are pre-defined and may be styled with an optional background color.

## Default

Block content.

## Alert

Block content.

## Example

Block content.

## Default

Block content.

## Alert

Block content.

## Example

Block content.

$$e = \lim_{n \rightarrow \infty} \left(1 + \frac{1}{n}\right)^n$$

# Line plots

# Bar charts

# Quotes

*Veni, Vidi, Vici*

# Frame footer

**SCPO** defines a custom beamer template to add a text to the footer. It can be set via

```
\setbeamertemplate{frame footer}{My custom footer}
```

The theme *itself* is licensed under a Creative Commons Attribution-ShareAlike 4.0 International License.

Questions?

# Backup slides

Sometimes, it is useful to add slides at the end of your presentation to refer to during audience questions.

The best way to do this is to include the `appendixnumberbeamer` package in your preamble and call `\appendix` before your backup slides.

**SCPO** will automatically turn off slide numbering and progress bars for slides in the appendix.
